

Cognitively Impaired (CI):

Allen Park Schools operates a mild Cognitively Impaired (CI) classroom at Arno Elementary for elementary students who need another layer of support above resource room.

While Grade Level Content Expectations are taught, it is not uncommon for students with cognitive impairments to need some curricular modifications and life skills support.

Some of our elementary students with cognitive impairments proceed to our Middle School resource rooms. Others are referred to CI programs in neighboring districts. These decisions are based on student need and are made in partnership with parents.
