

Early Childhood Program (ECP)

Allen Park's ECP program is housed at Bennie Elementary School. ECP provides services to special education eligible students, age three to five years old, who have developmental needs, most commonly in the area of communication.

This classroom program is geared to help prepare eligible students for kindergarten. This service is a half-day, five day per week classroom program. This program typically supports students with moderate developmental needs. Students with milder communication needs may be referred for drop-in speech services.
