

Medication Information

If your child's healthcare professional requires your child to receive medication in school, please have him/her write a script for the nurse. This should contain the following information: child's name, name of medication, dosage, frequency, time it's to be given, duration of its use, and reason it's being ordered. If the medication is ordered over the phone and not at a visit, please have the information faxed to the school at 609-723-8213, and followed by a hard copy.

Please notify the nurse at 609-723-2479 (press 1) of any forms that are being faxed from a healthcare provider's office.
